

Design Redefined.

TSP is proud of the many ways in which our projects have influenced the Midwest landscape. From the firm's first project, the Sioux Falls City Hall, to the many projects completed since then, the influence of Harold Spitznagel's philosophy is clear in everything we do: "Build it like you own it."

Contact us for information about any project type - with over 84 years of history, we've probably done it many times! We are working on building a comprehensive list of our experience, but in the meantime, here are just some of the project types we have completed.
